(Company No. 312552-W) (Incorporated in Malaysia) and its subsidiaries

Financial statements for the year ended 31 December 2018

(Company No. 312552-W) (Incorporated in Malaysia)

and its subsidiaries

Directors' report for the year ended 31 December 2018

The Directors have pleasure in submitting their report and the audited financial statements of the Group and of the Bank for the financial year ended 31 December 2018.

Principal activities

The principal activities of the Bank are banking and related financial services that also include Islamic Banking business. The principal activities of the subsidiary companies are set out in Note 8 to the financial statements. There have been no significant changes in these activities during the financial year.

Results

	Group and Bank RM'000
Profit before tax Tax expense	264,100 (63,202)
Profit for the year attributable to owner of the Bank	200,898

Dividends

Since the end of the previous financial year, the amount of dividends paid by the Bank was as follows:-

• In respect of the financial year ended 31 December 2017 as reported in the Director's Report of that year, a final ordinary dividend of 89.3 sen per ordinary share totalling RM155,000,000 paid on 11 July 2018.

The final dividend recommended by the Directors in respect of the financial year ended 31 December 2018 is 115.7 sen per ordinary share totaling RM200,898,000.

Reserves, provisions and allowances

There were no material transfers to or from reserves, provisions and allowances during the financial year under review other than those disclosed in the financial statements.

Directors of the Bank

Directors who served during the financial year until the date of this report are:

Tunku Dato' Mahmood Fawzy bin Tunku Muhiyiddin Dato' Yusof Annuar bin Yaacob Mr Steven Choy Khai Choon Madam Koid Swee Lian Mr Seamus Toal

Bad and doubtful debts and financing

Before the financial statements of the Group and of the Bank were made out, the Directors took reasonable steps to ascertain that actions had been taken in relation to the writing off of bad debts and financing and the making of allowance for impaired debts and financing, and satisfied themselves that all known bad debts and financing had been written off and adequate allowance had been made for impaired debts and financing.

At the date of this report, the Directors are not aware of any circumstances which would render the amount written off for bad debts and financing, or the amount of the allowance for impaired debts and financing, in the financial statements of the Group and of the Bank inadequate to any substantial extent.

Current assets

Before the financial statements of the Group and of the Bank were made out, the Directors took reasonable steps to ascertain that any current assets, other than debts and financing, which were unlikely to be realised in the ordinary course of business at their values as shown in the accounting records of the Group and of the Bank, have been written down to an amount which they might be expected to realise.

At the date of this report, the Directors are not aware of any circumstances which would render the values attributed to the current assets in the financial statements of the Group and of the Bank misleading.

Valuation methods

At the date of this report, the Directors are not aware of any circumstances which have arisen which render adherence to the existing methods of valuation of assets or liabilities in the financial statements of the Group and of the Bank misleading or inappropriate.

Contingent and other liabilities

At the date of this report, there does not exist:

- (a) any charge on the assets of the Group or of the Bank which has arisen since the end of the financial year and which secures the liabilities of any other person, or
- (b) any contingent liability in respect of the Group or of the Bank that has arisen since the end of the financial year other than those incurred in the ordinary course of business.

No contingent or other liability of the Group and of the Bank has become enforceable, or is likely to become enforceable within the period of twelve months after the end of the financial year which, in the opinion of the Directors, will or may substantially affect the ability of the Group and of the Bank to meet their obligations as and when they fall due.

Change of circumstances

At the date of this report, the Directors are not aware of any circumstances, not otherwise dealt with in this report or the financial statements of the Group and of the Bank, which would render any amount stated in the financial statements misleading.

Items of an unusual nature

The results of the operations of the Group and of the Bank for the financial year were not, in the opinion of the Directors, substantially affected by any item, transaction or event of a material and unusual nature.

There has not arisen in the interval between the end of the financial year and the date of this report any item, transaction or event of a material and unusual nature likely to affect substantially the results of the operations of the Group and of the Bank for the current financial year in which this report is made.

Compliance with Bank Negara Malaysia's expectations on financial reporting

In the preparation of the financial statements, the Directors have taken reasonable steps to ensure that Bank Negara Malaysia's expectations on financial reporting have been complied with, including those set out in the Guidelines on Financial Reporting.

Directors' interests in shares

According to the Register of Directors' Shareholdings maintained by the Bank in accordance with the Companies Act 2016, the Directors holding office at year end who have beneficial interests in the shares of the Bank and its related corporations are as follows:

	Ν	lumber of or	dinary share	es
	Balance at			Balance at
	1.1.2018	Bought	Sold	31.12.2018
Holding company Deutsche Bank Aktiengesellschaft				
Dato' Yusof Annuar bin Yaacob	19,101	3,001	22,102	-
	Ν	lumber of or	dinary share	es
	Balance at	Awarded/	Exercised/	Balance at
	1.1.2018	Granted	Vested	31.12.2018
Holding company				
Deutsche Bank Aktiengesellschaft - DB Restricted Equity Units Plan				
Dato' Yusof Annuar bin Yaacob	19,843	7,635	3,001	24,477
Seamus Toal	53,876	13,661	26,739	40,799

None of the other Directors held or dealt in the shares of the Bank or its related corporations during the financial year.

Directors' benefits

Since the end of the previous financial year, no Director of the Bank has received nor become entitled to receive any benefit (other than a benefit included in the aggregate amount of remuneration received or due and receivable by Directors as shown in Note 24 to the financial statements) by reason of a contract made by the Bank or a related corporation with the Director or with a firm of which the Director is a member, or with a company in which the Director has a substantial financial interest.

Neither at the end of the financial year, nor at any time during that year, did there subsist any arrangements to which the Bank is a party whereby Directors might acquire benefits by means of the acquisition of shares in, or debentures of, the Bank or any other body corporate other than the share and options compensation plans operated by Deutsche Bank Aktiengesellschaft as disclosed in Note 34.

Issue of shares and debentures

There were no changes in the issued and paid-up capital of the Bank during the financial year.

There were no debentures issued during the year.

Options granted over unissued shares

No options were granted to any person to take up unissued shares of the Bank during the year.

Indemnity and insurance costs

During the financial year, the total amount of insurance cost incurred for the Directors of the Bank net of Directors' contribution is RM50,516.

There were no indemnity and insurance cost effected for auditors of the Bank during the financial year.

Ultimate holding company

The Directors regard Deutsche Bank Aktiengesellschaft, a bank incorporated in Germany, as the immediate and ultimate holding company of the Bank during the financial year and until the date of this report.

Subsidiaries

The details of the Bank's subsidiaries are disclosed in Note 8 to the financial statements.

Auditors

The auditors, KPMG PLT, have indicated their willingness to accept re-appointment.

The auditors' remuneration is disclosed in Note 19 to the financial statements.

Shariah Committee's Report

In the name of Allah, the Beneficent, the Merciful

In compliance with the letter of appointment, we are required to submit the following report:

We have reviewed the principles and the contracts relating to the transactions and applications introduced by Deutsche Bank (Malaysia) Berhad's Islamic Banking division during the year ended 31 December 2018. We have also conducted our review to form an opinion as to whether Deutsche Bank (Malaysia) Berhad's Islamic Banking division has complied with the Shariah principles and with the Shariah rulings issued by the Shariah Advisory Council of Bank Negara Malaysia, as well as Shariah decisions made by us.

The management of Deutsche Bank (Malaysia) Berhad's Islamic Banking division ("Division") is responsible for ensuring that the Division conducts its business in accordance with the Shariah principles. It is our responsibility to form an independent opinion, based on our review of the operations of Deutsche Bank (Malaysia) Berhad's Islamic Banking division, and to report to you.

We have assessed the Shariah review work carried out by Shariah Compliance officer and internal Shariah audit.

We planned and performed our review so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the Islamic Banking division has not violated the Shariah principles.

In our opinion:

The contracts, transactions and dealings entered into by Deutsche Bank (Malaysia) Berhad's Islamic Banking division during the year ended 31 December 2018 that we have reviewed are in compliance with the Shariah principles.

We, the members of the Shariah Committee of Deutsche Bank (Malaysia) Berhad's Islamic Banking division, do hereby confirm that the operations of Deutsche Bank (Malaysia) Berhad's Islamic Banking division for the year ended 31 December 2018 have been conducted in conformity with the Shariah principles.

Dr. Sheikh Hussein Hamed Sayed Hassan (Chairman of Shariah Committee)

Dr Muhammad Qaseem (Member)

Encik Mohd Hilmi bin Ramli (Member)

INDEPENDENT AUDITORS' REPORT TO THE MEMBER OF DEUTSCHE BANK (MALAYSIA) BERHAD

(Company No. 312552-W) (Incorporated in Malaysia)

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Deutsche Bank (Malaysia) Berhad, which comprise the statements of financial position as at 31 December 2018 of the Group and of the Bank, and the statements of profit or loss and other comprehensive income, statements of changes in equity and statements of cash flows of the Group and of the Bank for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, as set out on pages 16 to 131.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Group and of the Bank as at 31 December 2018, and of their financial performance and their cash flows for the year then ended in accordance with Malaysian Financial Reporting Standards, International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia.

Basis for Opinion

We conducted our audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing. Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section of our auditors' report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence and Other Ethical Responsibilities

We are independent of the Group and of the Bank in accordance with the *By-Laws (on Professional Ethics, Conduct and Practice)* of the Malaysian Institute of Accountants ("By-Laws") and the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants* ("IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the By-Laws and the IESBA Code.

Deutsche Bank (Malaysia) Berhad Independent Auditors' Report for the Financial Year Ended 31 December 2018

Information Other than the Financial Statements and Auditors' Report Thereon

The Directors of the Bank are responsible for the other information. The other information comprises the information included in the Directors' Report and Shariah Committee's Report, but does not include the financial statements of the Group and of the Bank and our auditors' report thereon.

Our opinion on the financial statements of the Group and of the Bank does not cover the Directors' Report and Shariah Committee's Report and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements of the Group and of the Bank, our responsibility is to read the Directors' Report and Shariah Committee's Report and, in doing so, consider whether the Directors' Report and Shariah Committee's Report are materially inconsistent with the financial statements of the Group and of the Bank or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of the Directors' Report and Shariah Committee's Report in this regard.

Responsibilities of the Directors for the Financial Statements

The Directors of the Bank are responsible for the preparation of financial statements of the Group and of the Bank that give a true and fair view in accordance with Malaysian Financial Reporting Standards, International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia. The Directors are also responsible for such internal control as the Directors determine is necessary to enable the preparation of financial statements of the Group and of the Bank that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements of the Group and of the Bank, the Directors are responsible for assessing the ability of the Group and of the Bank to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or the Bank or to cease operations, or have no realistic alternative but to do so.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements of the Group and of the Bank as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Deutsche Bank (Malaysia) Berhad Independent Auditors' Report for the Financial Year Ended 31 December 2018

Auditors' Responsibilities for the Audit of the Financial Statements (continued)

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements of the Group and of the Bank, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control of the Group and of the Bank.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group or the Bank to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements of the Group and of the Bank or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group or the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements of the Group and of the Bank, including the disclosures, and whether the financial statements of the Group and of the Bank represent the underlying transactions and events in a manner that gives a true and fair view.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the financial statements of the Group. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Deutsche Bank (Malaysia) Berhad Independent Auditors' Report for the Financial Year Ended 31 December 2018

Other Matters

This report is made solely to the member of the Bank, as a body, in accordance with Section 266 of the Companies Act 2016 in Malaysia and for no other purpose. We do not assume responsibility to any other person for the content of this report.

(Company No. 312552-W) (Incorporated in Malaysia)

and its subsidiaries

Notes to the financial statements

Deutsche Bank (Malaysia) Berhad ("the Bank") is a public limited liability company incorporated and domiciled in Malaysia. The address of both its registered office and principal place of business is located at Level 18, Menara IMC, 8, Jalan Sultan Ismail, 50250 Kuala Lumpur. The consolidated financial statements of the Bank as at and for the year ended 31 December 2018 comprise the Bank and its subsidiaries (together referred to as the "Group" and individually referred to as "Group entities").

The Bank is principally engaged in banking and related financial services that also include Islamic Banking business, whilst the principal activities of the subsidiaries are stated at Note 8 to the financial statements.

The immediate and ultimate holding company of the Bank is Deutsche Bank Aktiengesellschaft, a bank incorporated in Germany.

The financial statements were approved and authorised for issue by the Board of Directors on _____.

1. Basis of preparation

(a) Statement of compliance

The financial statements of the Group and of the Bank have been prepared in accordance with Malaysian Financial Reporting Standards ("MFRSs"), International Financial Reporting Standards ("IFRSs") and the requirements of the Companies Act 2016 in Malaysia.

1. Basis of preparation (continued)

(a) Statement of compliance (continued)

Pursuant to paragraph 10.5 of the Guidelines on Financial Reporting issued by Bank Negara Malaysia, all banking institutions are required to maintain in aggregate, loss allowance for non-credit-impaired exposures and regulatory reserve of no less than 1.0% over the total credit exposures, net of loss allowance for credit-impaired exposures. The Bank has complied with this minimum requirement as at 31 December 2018.

The following are accounting standards, amendments and interpretations that have been issued by the Malaysian Accounting Standards Board ("MASB") but have not been adopted by the Group and the Bank:

MFRSs, Interpretations and amendments effective for annual periods beginning on or after 1 January 2019

- MFRS 16, *Leases*
- IC Interpretation 23, Uncertainty over Income Tax Treatments
- Amendments to MFRS 3, Business Combinations (Annual Improvements to MFRS Standards 2015-2017 Cycle)
- Amendments to MFRS 9, *Financial Instruments Prepayment Features with* Negative Compensation
- Amendments to MFRS 11, Joint Arrangements (Annual Improvements to MFRS Standards 2015-2017 Cycle)
- Amendments to MFRS 112, Income Taxes (Annual Improvements to MFRS Standards 2015-2017 Cycle)
- Amendments to MFRS 119, Employee Benefits Plan Amendment, Curtailment or Settlement
- Amendments to MFRS 123, Borrowing Costs (Annual Improvements to MFRS Standards 2015-2017 Cycle)
- Amendments to MFRS 128, *Investments in Associates and Joint Ventures –* Long-term Interests in Associates and Joint Venture

MFRSs, Interpretations and amendments effective for annual periods beginning on or after 1 January 2020

- Amendments to MFRS 3, Business Combinations Definition of a Business
- Amendments to MFRS 101, Presentation of Financial Statements and MFRS 108, Accounting Policies, Changes in Accounting Estimates and Errors – Definition of Material

1. Basis of preparation (continued)

(a) Statement of compliance (continued)

MFRSs, Interpretations and amendments effective for annual periods beginning on or after 1 January 2021

• MFRS 17, Insurance Contracts

MFRSs, Interpretations and amendments effective for annual periods beginning on or after a date yet to be confirmed

• Amendments to MFRS 10, Consolidated Financial Statements and MFRS 128, Investments in Associates and Joint Ventures – Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The Group and the Bank plan to apply the abovementioned accounting standards, amendments and interpretations, where applicable:

- from the annual period beginning on 1 January 2019 for the accounting standard, amendments and interpretation that are effective for annual periods beginning on or after 1 January 2019;
- from the annual period beginning on 1 January 2020 for the amendments that are effective for annual periods beginning on or after 1 January 2020; and
- from the annual period beginning on 1 January 2021 for the accounting standard that is effective for annual periods beginning on or after 1 January 2021.

The initial application of the accounting standards, amendments and interpretations are not expected to have any material financial impact to the current period and prior period financial statements of the Group and the Bank.

1. Basis of preparation (continued)

(b) Basis of measurement

The financial statements of the Group and the Bank have been prepared on the historical cost basis, except as mentioned in the respective accounting policy notes.

The financial statements incorporate all activities relating to the Islamic Banking business which have been undertaken by the Group and the Bank. Islamic Banking business refers generally to the acceptance of deposits and granting of financing under the principles of Shariah.

(c) Functional and presentation currency

The financial statements are presented in Ringgit Malaysia ("RM") which is also the functional currency of the Bank. All financial information is presented in RM and has been rounded to the nearest thousand (RM'000), unless otherwise stated.

(d) Use of estimates and judgements

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amount of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Significant areas of estimation, uncertainty and critical judgements used in applying accounting policies that have significant effect on the amount recognised in the financial statements are described in the following notes:

- Note 2(c)(vi) and 33.2 Fair value of financial instruments
- Note 2(d)(i) Impairment of financial assets
- Note 10 Deferred tax assets

2. Significant accounting policies

The accounting policies set out below have been applied consistently to the periods presented in these financial statements, and have been applied consistently by the Group entities, unless otherwise stated.

Arising from the adoption of MFRS 9, *Financial Instruments*, there are changes to the accounting policies of financial instruments and impairment of financial assets as compared to those adopted in previous financial statements. The impacts arising from the changes are disclosed in Note 2(c), Note 2(d)(i) and Note 35.

(a) Basis of consolidation

(i) Subsidiaries

Subsidiaries are entities, including structured entities, controlled by the Bank. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

The Bank controls an entity when it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Potential voting rights are considered when assessing control only when such rights are substantive. The Bank also considers it has de facto power over an investee when, despite not having the majority of voting rights, it has the current ability to direct the activities of the investee that significantly affect the investee's return.

Investments in subsidiaries are measured in the Bank's statement of financial position at cost less any impairment losses, unless the investment is classified as held for sale or distribution. The cost of investment includes transaction costs.

(ii) Loss of control

Upon the loss of control of a subsidiary, the Bank derecognises the assets and liabilities of the former subsidiary, any non-controlling interests and the other components of equity related to the former subsidiary from the consolidated statement of financial position. Any surplus or deficit arising on the loss of control is recognised in profit or loss. If the Bank retains any interest in the former subsidiary, then such interest is measured at fair value at the date that control is lost. Subsequently, it is accounted for as an equity accounted investee or as a financial asset depending on the level of influence retained.

(a) Basis of consolidation (continued)

(iii) Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements.

(b) Cash and cash equivalents

Cash and cash equivalents comprise cash and balances with banks and other financial institutions, and short-term deposits maturing within three months.

(c) Financial instruments

Unless specifically disclosed below, the Group and the Bank generally applied the following accounting policies retrospectively. Nevertheless, as permitted by MFRS 9, *Financial Instruments*, the Group and the Bank have elected not to restate the comparative.

(i) Recognition and initial measurement

A financial asset or a financial liability is recognised in the statements of financial position when, and only when, the Group or the Bank becomes a party to the contractual provisions of the instrument.

A financial instrument is recognised initially, at its fair value plus, in the case of a financial instrument not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial instrument.

(c) Financial instruments (continued)

(ii) Financial instrument categories and subsequent measurement

Current financial year

Financial assets

Under MFRS 9, on initial recognition, a financial asset is classified as measured at: amortised cost; fair value through other comprehensive income ("FVOCI") – debt securities; FVOCI – equity investments; or fair value through profit or loss ("FVTPL"). The classification of financial assets under MFRS 9 is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics. Derivatives embedded in contracts where the host is a financial asset in the scope of the standard are never separated. Instead, the hybrid financial instrument as a whole is assessed for classification.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding.

A debt security is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding.

On initial recognition of an equity investment that is not held for trading, the Group and the Bank may irrevocably elect to present subsequent changes in the investment's fair value in other comprehensive income ("OCI"). This election is made on an investment-by-investment basis.

(c) Financial instruments (continued)

(ii) Financial instrument categories and subsequent measurement (continued)

Current financial year (continued)

Financial assets (continued)

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative assets. On initial recognition, the Group and the Bank may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

The following accounting policies apply to the subsequent measurement of financial assets.

Financial assets at	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend
FVTPL Financial assets at amortised cost	income, are recognised in profit or loss. These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.
Debt securities at FVOCI	These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.
Equity investments at FVOCI	These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are never reclassified to profit or loss.

(c) Financial instruments (continued)

(ii) Financial instrument categories and subsequent measurement (continued)

Current financial year (continued)

Financial liabilities

The categories of financial liabilities at initial recognition are as follows:

(a) Fair value through profit or loss

Fair value through profit or loss category comprises financial liabilities that are derivatives (except for a derivative that is a financial guarantee contract or a designated and effective hedging instrument) and financial liabilities that are specifically designated into this category upon initial recognition.

On initial recognition, the Group or the Bank may irrevocably designate a financial liability that otherwise meets the requirements to be measured at amortised cost as at fair value through profit or loss:

- (a) if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise;
- (b) a group of financial liabilities or assets and financial liabilities is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and information about the group is provided internally on that basis to the Group's key management personnel; or
- (c) if a contract contains one or more embedded derivatives and the host is not a financial asset in the scope of MFRS 9, where the embedded derivative significantly modifies the cash flows and separation is not prohibited.

(c) Financial instruments (continued)

(ii) Financial instrument categories and subsequent measurement (continued)

Current financial year (continued)

Financial liabilities (continued)

(a) Fair value through profit or loss (continued)

Financial liabilities categorised as fair value through profit or loss are subsequently measured at their fair value with gains or losses, including any interest expense are recognised in profit or loss.

For financial liabilities where it is designated as fair value through profit or loss upon initial recognition, the Group and the Bank recognise the amount of change in fair value of the financial liability that is attributable to change in credit risk in the other comprehensive income and remaining amount of the change in fair value in the profit or loss, unless the treatment of the effects of changes in the liability's credit risk would create or enlarge an accounting mismatch.

(b) Amortised cost

Other financial liabilities not categorised as fair value through profit or loss are subsequently measured at amortised cost using the effective interest method.

Interest expense and foreign exchange gains and losses are recognised in the profit or loss. Any gains or losses on derecognition are also recognised in profit or loss.

(c) Financial instruments (continued)

(ii) Financial instrument categories and subsequent measurement (continued)

Previous financial year

In the previous financial year, financial instruments of the Group and the Bank were classified and measured under MFRS 139, *Financial Instruments: Recognition and Measurement* as follows:

Financial assets

i. Financial assets at fair value through profit or loss

Fair value through profit or loss category comprised financial assets that were held-for-trading, including derivatives or financial assets that were specifically designated into this category upon initial recognition.

Derivatives that were linked to and must be settled by delivery of unquoted equity instruments whose fair values could not be reliably measured were measured at cost.

Financial assets categorised as fair value through profit or loss were subsequently measured at their fair values with the gain or loss recognised in profit or loss.

(c) Financial instruments (continued)

(ii) Financial instrument categories and subsequent measurement (continued)

Previous financial year (continued)

Financial assets (continued)

ii. Loans and receivables

Loans and receivables category comprised debt instruments that were not quoted in an active market.

Financial assets categorised as loans and receivables were subsequently measured at amortised cost using the effective interest method.

iii. Financial investments available-for-sale

Available-for-sale financial assets were non-derivative financial assets, comprising investment in equity and debt securities instruments that were not categorised into any of the other categories above. Financial assets available-for-sale were usually held for an indefinite period of time, which may be sold in response to liquidity requirement or changes in market conditions.

iv. Financial investments available-for-sale

Investments in equity instruments that did not have a quoted market price in an active market and whose fair value could not be reliably measured were measured at cost. Other financial assets categorised as available-for-sale were subsequently measured at their fair values with the gain or loss recognised in other comprehensive income, except for impairment losses, foreign exchange gains and losses arising from monetary items which were recognised in profit or loss. On derecognition, the cumulative gain or loss recognised in other comprehensive income was reclassified from equity into profit or loss. Interest calculated for a debt instrument using the effective interest method was recognised in profit or loss.

All financial assets, except for those measured at fair value through profit or loss, were subject to impairment assessment.

(c) Financial instruments (continued)

(ii) Financial instrument categories and subsequent measurement (continued)

Previous financial year (continued)

Financial liabilities

All financial liabilities were subsequently measured at amortised cost other than those categorised as fair value through profit or loss.

Fair value through profit or loss category comprised financial liabilities that were held-for-trading, including derivatives or financial liabilities that were specifically designated into this category upon initial recognition.

Derivatives that were linked to and must be settled by delivery of unquoted equity instruments whose fair values could not be reliably measured were measured at cost.

Financial liabilities categorised as fair value through profit or loss were subsequently measured at their fair values with the gain or loss recognised in profit or loss.

(c) Financial instruments (continued)

(iii) Financial guarantee contracts

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Current financial year

Financial guarantees issued are initially measured at fair value. Subsequently, they are measured at higher of:

- the amount of the loss allowance; and
- the amount initially recognised less, when appropriate, the cumulative amount of income recognised in accordance to the principles of MFRS 15, *Revenue from Contracts with Customers*.

Liabilities arising from financial guarantees are presented together with other provisions.

Previous financial year

In the previous financial year, fair value arising from financial guarantee contracts were classified as deferred income and were amortised to profit or loss using straight-line method over the contractual period or, when there was no specified contractual period, recognised in profit or loss upon discharge of the guarantee. When settlement of a financial guarantee contract was probable, an estimate of the obligation was made. If the carrying value of the financial guarantee contract was lower than the obligation, the carrying value was adjusted to the obligation amount and accounted for as a provision.

(iv) Regular way purchase or sale of financial assets

A regular way purchase or sale is a purchase or sale of a financial asset under a contract whose terms require delivery of the asset within the time frame established generally by regulation or convention in the marketplace concerned.

A regular way purchase or sale of financial assets is recognised and derecognised, as applicable, using trade date accounting. Trade date accounting refers to:

- (a) the recognition of an asset to be received and the liability to pay for it on the trade date, and
- (b) derecognition of an asset that is sold, recognition of any gain or loss on disposal and the recognition of a receivable from the buyer for payment on the trade date.

(c) Financial instruments (continued)

(v) Derecognition

A financial asset or part of it is derecognised when, and only when, the contractual rights to the cash flows from the financial asset expire or the financial asset is transferred to another party without retaining control or substantially all risks and rewards of the asset. On derecognition of a financial asset, the difference between the carrying amount and the sum of the consideration received (including any new asset obtained less any new liability assumed) is recognised in the profit or loss.

A financial liability or a part of it is derecognised when, and only when, the obligation specified in the contract is discharged or cancelled or expires. On derecognition of a financial liability, the difference between the carrying amount of the financial liability extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in the profit or loss.

(vi) Determination of fair value

Fair value of an asset or a liability, except for share-based payment and lease transactions, is determined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The measurement assumes that the transaction to sell the asset or transfer the liability takes place either in the principal market or in the absence of a principal market, in the most advantageous market.

For non-financial asset, the fair value measurement takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

When measuring the fair value of an asset or a liability, the Group uses observable market data as far as possible. Fair value are categorised into different levels in a fair value hierarchy based on the input used in the valuation technique as follows:

(c) Financial instruments (continued)

(vi) Determination of fair value (continued)

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: unobservable inputs for the asset or liability.

The Group recognises transfers between levels of the fair value hierarchy as of the date of the event or change in circumstances that caused the transfers.

For financial instruments measured at fair value, where available, quoted and observable market prices in an active market or dealer price quotations are used to measure fair value. These include listed equity securities and broker quotes on Bloomberg and Reuters.

Where such quoted and observable market prices are not available, fair values are determined using appropriate valuation techniques, which include the use of mathematical models, such as discounted cash flow models and option pricing models, comparison to similar instruments for which market observable prices exist and other valuation techniques. Valuation techniques used incorporate assumptions regarding discount rates, interest/profit rate yield curves, estimates of future cash flows and other factors, as applicable. The Group and the Bank generally use widely recognised valuation techniques with market observable inputs, if available, for the determination of fair value.

(c) Financial instruments (continued)

(vi) Determination of fair value (continued)

If prices and parameter inputs or assumptions are not observable, the appropriateness of fair value is subject to additional procedures to assess its reasonableness. Such procedures include performing revaluations using independently generated models, assessing the valuations against appropriate proxy instruments, performing sensitivity analysis and extrapolation techniques, and considering other benchmarks. Assessment is made as to whether the valuation techniques yield fair value estimates that are reflective of the way the market operates by calibrating the results of the valuation models. These procedures require the application of management judgement.

(vii) Offsetting of financial instruments

Financial assets and liabilities are offset and the net amount reported in the statements of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and to settle the liability simultaneously. This is not generally the case with master netting agreements and therefore, the related assets and liabilities are presented on a gross basis in the statements of financial position.

(d) Impairment

Unless specifically disclosed below, the Group and the Bank generally applied the following accounting policies retrospectively. Nevertheless, as permitted by MFRS 9, *Financial Instruments*, the Group and the Bank elected not to restate the comparatives.

i. Financial assets

Current financial year

MFRS 9 replaces the 'incurred loss' model in MFRS 139 with an 'expected credit loss' model. The new impairment model applies to all debt instruments that are measured at amortised cost or FVOCI, and to offbalance sheet credit exposures such as loan commitments and financial guarantees (hereafter collectively referred to as "Financial Assets").

Staged Approach to the Determination of Expected Credit Losses

MFRS 9 introduces a three stage approach to impairment for Financial Assets at the date of origination or purchase. This approach is summarised as follows:

- Stage 1: The Bank recognises a loss allowance at an amount equal to 12-month expected credit losses ("ECL"). This represents the portion of lifetime ECL from default events that are expected within 12 months of the reporting date, assuming that credit risk has not increased significantly after initial recognition.
- Stage 2: The Bank recognises a loss allowance at an amount equal to lifetime ECL for those Financial Assets which are considered to have experienced a significant increase in credit risk since initial recognition. This requires the computation of ECL based on lifetime probability of default (LTPD) that represents the probability of default occurring over the remaining lifetime of the Financial Asset. Allowance for credit losses are higher in this stage because of an increase in credit risk and the impact of a longer time horizon being considered compared to 12 months in Stage 1.
- Stage 3: The Bank recognises a loss allowance at an amount equal to lifetime ECL, reflecting a Probability of Default (PD) of 100 %, via the recoverable cash flows for the asset, for those Financial Assets that are credit-impaired. The Group's definition of default is aligned with the regulatory definition. The treatment of loans in Stage 3 remains substantially the same as the treatment of impaired loans under MFRS 139.

Financial Assets that are credit-impaired upon initial recognition, if any, are categorised within Stage 3 with a carrying value already reflecting the lifetime ECL.

- (d) Impairment (continued)
 - i. Financial assets (continued)

Current financial year (continued)

Significant Increase in Credit Risk

Under MFRS 9, when determining whether the credit risk (i.e., risk of default) of a Financial Asset has increased significantly since initial recognition, the Bank considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes quantitative and qualitative information based on historical experience, credit risk assessment and forward-looking information (including macro-economic factors). The assessment of significant credit deterioration is key in determining when to move from measuring an allowance based on 12-month ECLs to one that is based on lifetime ECLs.

Credit-impaired financial assets

The determination of whether a Financial Asset is credit impaired focusses exclusively on default risk, without taking into consideration the effects of credit risk mitigants such as collateral or guarantees. Specifically, a Financial Asset is credit impaired and in Stage 3 when:

- The Bank considers the obligor is unlikely to pay its credit obligations to the Bank. Determination may include forbearance actions, where a concession has been granted to the borrower or economic or legal reasons that are qualitative indicators of credit impairment; or
- Contractual payments of either principal or interest by the obligor are past due by more than 90 days.

For Financial Assets considered to be credit impaired, the ECL allowance covers the amount of loss the Bank is expected to suffer. Forecasts of future economic conditions when calculating ECLs are considered. The lifetime expected losses are estimated based on the probability-weighted present value of the difference between 1) the contractual cash flows that are due to the Bank under the contract; and 2) the cash flows that the Bank expects to receive.

(d) Impairment (continued)

i. Financial assets (continued)

Previous financial year

All financial assets (except for financial assets categorised as fair value through profit or loss and investments in subsidiaries) were assessed at each reporting date whether there was any objective evidence of impairment as a result of one or more events having an impact on the estimated future cash flows of the asset. Losses expected as a result of future events, no matter how likely, were not recognised. For an equity instrument, a significant or prolonged decline in the fair value below its cost was an objective evidence of impairment. If any such objective evidence exists, then the impairment loss of the financial assets was estimated.

In respect of loans, advances and financing, the Group and the Bank first assessed whether objective evidence of impairment existed individually for loans which were individually significant, or collectively for loans which were not individually significant. An individually assessed loan was deemed to be impaired if, and only if, there was objective evidence of impairment as a result of one or more events that had occurred after the initial recognition of the loans (an incurred "loss event") and that loss event (or events) had an impact on the present value of estimated future cash flows of the loans that could be reliably estimated.

Objective evidence of impairment may include indications that a borrower or a group of borrowers was experiencing significant financial difficulty, default or delinquency in interest or principal payments, that it was possible that they would enter bankruptcy or other financial reorganisation and that there were observable data indicating a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlated with default.

(d) Impairment (continued)

i. Financial assets (continued)

Previous financial year (continued)

If there was objective evidence that an impairment loss had been incurred, the amount of loss was measured as the difference between the loan's carrying amount and the present value of the estimated future cash flows discounted at the loan's original effective interest rate. The carrying amount of the loan was reduced through the use of an allowance account and the amount of loss was recognised in the profit or loss. Where appropriate, the calculation of the present value of estimated future cash flows of a collateralised loan reflected the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure was probable.

Where a loan was not recoverable, it was written off against the related allowance for loan impairment. Such loans were written off after the necessary procedures had been completed and the amount of the loss had been determined. Subsequent recoveries of the amounts previously written off were recognised in the profit or loss.

Under the Guidelines on Classification and Impairment Provision for Loans/Financing issued by BNM where loans, advances and financing that was past due for more than 90 days/3 months should be classified as impaired. The Bank applied this policy in addition to the above when determining if a loan was impaired.

(d) Impairment (continued)

i. Financial assets (continued)

Previous financial year (continued)

An impairment loss in respect of financial investments available-for-sale was recognised in profit or loss and was measured as the difference between the asset's acquisition cost (net of any principal repayment and amortisation) and the asset's current fair value, less any impairment loss previously recognised. Where a decline in the fair value of a financial investment available-for-sale had been recognised in the other comprehensive income, the cumulative loss in other comprehensive income was reclassified from equity and recognised to profit or loss.

An impairment loss in respect of unquoted equity instrument that was carried at cost was recognised in profit or loss and was measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset.

Impairment losses recognised in profit or loss for an investment in an equity instrument classified as available-for-sale was not reversed through profit or loss.

If, in a subsequent period, the fair value of a debt instrument increased and the increase could be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the impairment loss was reversed, to the extent that the asset's carrying amount did not exceed what the carrying amount would have been had the impairment not been recognised at the date the impairment was reversed. The amount of the reversal was recognised in profit or loss.

ii. Other assets

The carrying amounts of other assets (except for deferred tax assets) are reviewed at the end of each reporting period to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

For the purpose of impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash-generating unit").

(d) Impairment (continued)

ii. Other assets (continued)

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs of disposal. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or cash-generating unit.

An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount.

Impairment losses are recognised in profit or loss. Impairment losses recognised in respect of cash-generating units are allocated to reduce the carrying amounts of the assets in the cash-generating unit (groups of cash-generating units) on a *pro rata* basis.

Impairment losses recognised in prior periods are assessed at the end of each reporting period for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount since the last impairment loss was recognised. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised. Reversals of impairment losses are credited to profit or loss in the year in which the reversals are recognised.

(e) Repurchase agreements

Reverse repurchase agreements are securities which the Bank commits to resell at future dates and are reflected as an asset.

Repurchase agreements are obligations which the Bank commits to repurchase at future dates and are reflected as a liability.

(f) Property and equipment

(i) Recognition and measurement

Items of property and equipment are measured at cost less accumulated depreciation and accumulated impairment losses, if any.

Cost includes expenditures that are directly attributable to the acquisition of the asset and any other costs directly attributable to bringing the asset to working condition for its intended use, and the costs of dismantling and removing the items and restoring the site on which they are located. The cost of self-constructed assets also includes the cost of materials and direct labour.

When significant parts of an item of property and equipment have different useful lives, they are accounted for as separate items (major components) of property and equipment.

Gains and losses on disposal of an item of property and equipment are determined by comparing the proceeds from disposal with the carrying amount of property and equipment and are recognised net within "other operating income" and "other operating expenses" respectively in profit or loss.

(ii) Subsequent costs

The cost of replacing part of an item of property and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Group or the Bank, and its cost can be measured reliably. The carrying amount of the replaced part is derecognised to profit or loss. The costs of the day-to-day servicing of property and equipment are recognised in profit or loss as incurred.

(f) Property and equipment (continued)

(iii) Depreciation

Depreciation is calculated on the depreciable amount, which is the cost of an asset, or other amount substituted for cost, less its residual value.

Depreciation is recognised in profit or loss on a straight-line basis over the estimated useful lives of each component of an item of property and equipment from the date that they are available for use. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Group or the Bank will obtain ownership by the end of the lease term. The estimated useful lives for the current and comparative periods are as follows:

Renovations	5 – 10 years
Office equipment	4 – 10 years
Computer equipment and software	3 – 5 years
Furniture and fittings	5 – 10 years
Motor vehicles	4 – 5 years

Depreciation methods, useful lives and residual values are reviewed, and adjusted as appropriate at the end of the reporting period.

(g) Income tax

Income tax expense comprises current and deferred tax. Current tax and deferred tax are recognised in profit or loss except to the extent that it relates to a business combination or items recognised directly in equity or other comprehensive income.

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted by the end of the reporting period, and any adjustment to tax payable in respect of previous financial years.

Deferred tax is recognised using the liability method, providing for temporary differences between the carrying amounts of assets and liabilities in the statements of financial position and their tax bases. Deferred tax is not recognised for the following temporary differences: the initial recognition of goodwill, the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss. Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax assets and liabilities on a net basis or their tax assets and liabilities will be realised simultaneously.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilised. Deferred tax assets are reviewed at the end of each reporting period and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

(h) Recognition of interest and financing income and expense

Interest and financing income and expense for all interest-bearing financial instruments are recognised in the statements of profit or loss and other comprehensive income using the effective interest rates of the financial assets or financial liabilities to which they relate.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability, or where appropriate, a shorter period, to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Group and the Bank estimate cash flows considering all contractual terms of the financial instrument but not future credit losses. The calculation includes all amounts paid or received by the Bank that are an integral part of the effective interest rate, including transaction costs and all other premiums or discounts.

(i) Recognition of fees and other income

Loan arrangement fees and commissions are recognised as income when all conditions precedent are fulfilled.

Commitment fees and guarantee fees are recognised as income based on time apportionment over the contractual period.

Dividends from securities are recognised when the right to receive payment is established.

(j) Foreign currency transactions

Transactions in foreign currencies are translated to the functional currency of the Group and the Bank at exchange rates at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies at the end of the reporting period are retranslated to the functional currency at the exchange rate at that date.

Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined. Foreign currency differences arising on retranslation are recognised in the profit or loss.

(k) Employee benefits

(i) Short-term employee benefits

Wages, salaries, bonuses and social security contributions are recognised as an expense in the year in which the associated services are rendered by employees of the Group and the Bank. Short-term accumulating compensated absences such as paid annual leaves are recognised when services are rendered by employees that increase their entitlement to future compensated absences, and short-term non-accumulating compensated absences such as sick leave are recognised when the absences occur.

(ii) Defined contribution plan

As required by law, companies in Malaysia make contributions to the state pension scheme, the Employees' Provident Fund ("EPF"). Such contributions are recognised as expense in the statements of profit or loss and other comprehensive income as incurred.

(k) Employee benefits (continued)

(iii) Share-based compensation

The Group and the Bank participate in equity-settled and cash-settled share based compensation plan for the employees that is offered by the ultimate holding company, Deutsche Bank Aktiengesellschaft, a bank incorporated in Germany. The fair value of the services received in exchange for the grant of the options is recognised as an expense in the profit of loss over the vesting periods of the grant.

The total amount to be expensed over the vesting period is determined by reference to the fair value of the options granted, excluding the impact of any non-market vesting conditions. Non-market vesting conditions are included in assumptions about the number of options that are expected to vest. At each reporting date, the Group and the Bank revise its estimates of the number of options that are expected to vest. The Group and the Bank recognise the impact of the revision of original estimates, if any, in the profit or loss.

(I) Operating lease

Leases, where the Group and the Bank do not assume substantially all the risks and rewards of ownership are classified as operating leases and, except for property interest held under operating lease, the leased assets are not recognised on the statements of financial position.

Payments made under operating leases are recognised in the statements of profit or loss and other comprehensive income on a straight-line basis over the term of the lease. Lease incentives received are recognised in profit or loss as an integral part of the total lease expense, over the term of the lease.

(m) Earnings per ordinary share

The Group and the Bank present basic earnings per share ("EPS") data for their ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Group and the Bank by the weighted average number of ordinary shares outstanding during the year.

(n) Provisions

A provision is recognised if, as a result of a past event, the Group or the Bank has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as finance cost.

3. Cash and cash equivalents

Other liabilities	821,527	788,405	
	1,740,204	2,446,461	

14. Share capital

		Group a	and Bank	
	Number of shares 2018 '000	Amount 2018 RM'000	Number of shares 2017 '000	Amount 2017 RM'000
Ordinary shares: Issued and fully paid	000		000	
At 1 January Transfer from share premium in accordance with Section 618(2) of the	173,599	531,362	173,599	173,599
Companies Act 2016 At 31 December	- 173,599	- 531,362	- 173,599	357,763 531,362

14. Share capital (continued)

The holders of ordinary shares are entitled to receive dividends as declared from time to time, and are entitled to one vote per share at meeting of the Bank.

During the financial year ended 31 December 2017, the Group and the Bank has transferred RM357,763,000 from share premium pursuant to the transition provisions set out in Section 618(2) of the Companies Act 2016.

There is no impact on the number of ordinary shares in issue or the relative entitlement of the member as a result of this transfer of the amount in the share premium account to share capital account.

15. Reserves

	Group and Bank	
	2018 RM'000	2017 RM'000
Non-distributable:		
Regulatory reserve	40,000	13,558
Fair value reserve	77	-
	40,077	13,558
Distributable:		
Retained earnings	1,301,982	1,273,835
	1,342,059	1,287,393

The regulatory reserve is maintained to comply with Bank Negara Malaysia's Guidelines on Financial Reporting dated 2 February 2018 which requires the Bank to maintain in aggregate, loss allowance for non-credit impaired exposures and regulatory reserve of no less than 1.0% of all credit exposures, net of loss allowance for credit impaired exposures.

During the current financial year, the Group and the Bank have transferred RM26,442,000 from their retained earnings to regulatory reserve in order to comply with the abovementioned requirement.

21. Related parties

Identity of related parties

For the purposes of these financial statements, parties are considered to be related to the Group if the Group or the Bank has the ability, directly or indirectly, to control the party or exercise significant influence over the party in making financial and operating decisions, or vice versa, or where the Bank and the party are subject to common control. Related parties may be individuals or other entities.

The Group has related party relationship with its holding company, other related companies, Directors and key management personnel.

Transactions with key management personnel

Key management personnel compensation

Key management personnel compensation is disclosed in Note 24.

21. Related parties (continued)

Other significant related party transactions and balances of the Group and the Bank are as follows:

The above disclosure is presented in accordance with the requirements of Paragraph 9.1 of Bank Negara Malaysia's Revised Guidelines on Credit Transaction and Exposures with Connected Parties.

Credit transactions and exposures to connected parties as disclosed above includes the extension of credit facilities and/or off-balance sheet credit exposures such as guarantees, trade-related facilities and loan commitments. It also includes holdings of equities and corporate bonds issued by the connected parties.

The credit transactions with connected parties above are all transacted on an arm's length basis and on terms and conditions no more favourable than those entered into with other counterparties with similar circumstances and credit worthiness. Due care has been taken to ensure that the credit worthiness of the connected party is not less than that normally required of other persons.

23. Intercompany charges

Below disclosure on intercompany charges is presented in accordance with the requirements of Paragraph 11.4(u) of Bank Negara Malaysia's Guidelines on Financial Reporting.

23.1 Intercompany charges analysed by type of services received are as follows:

	Group and Bank

	63,202	63,724
Tax recognised directly in equity:		
Fair value reserve (Note 10)	10	_

26. Earnings per share

Basic earnings per share

The calculation of basic earnings per share for the year ended 31 December 2018 was based on the profit attributable to ordinary shareholders and a weighted average number of ordinary shares outstanding, calculated as follows:

	Group ar 2018 RM'000	nd Bank 2017 RM'000
Profits attributable to ordinary shareholders	200,898	210,365
Weighted average number of ordinary shares - Issued ordinary shares during the year	173,599	173,599
	Group ar 2018 (sen)	nd Bank 2017 (sen)
Basic earnings per share	115.7	121.2

Diluted earnings per share

The Group and the Bank have no dilution in their earnings per ordinary share in the current financial year as the Group and the Bank do not have dilutive instruments.

27. Dividends

Dividends recognised by the Bank:

	Group and Bank		
	Sen per share	Total amount	Date of Payment
2018		RM'000	
Final 2017 ordinary	89.3	155,000	11 July 2018
2017			
Final 2016 ordinary	84.7	147,039	22 June 2017

After the end of the reporting period, the Directors recommended final dividend of 115.7 sen per ordinary share totalling RM200,898,000 in respect of the financial year ended 31 December 2018. This dividend will be recognised in the subsequent financial year upon approval by the shareholders of the Bank.

28. Operating leases

Leases as lessee

Non-cancellable operating lease rentals are payable as follows:

	Group ar	nd Bank
	2018	2017
	RM'000	RM'000
Less than one year Between one and five years	2,334 2,776	559 105
	5,110	664

The Group and the Bank lease office premises under operating leases. The leases typically run for a period of 3 years, with an option to renew the lease after that date. None of the leases includes contingent rentals.

29. Capital adequacy

	Group and Bank	
	2018 RM'000	2017 RM'000
Components of Tier 1 and Tier 2 capital are as follows:		
Tier 1 capital		
Paid-up share capital Other disclosed reserves	531,362 36	531,362
Retained profits Less: Deferred tax assets	1,301,982 (35,355)	1,273,835 (27,299)
Total common equity tier 1/Total tier 1 capital	1,798,025	1,777,898
Tier 2 capital		
Expected credit losses ("ECL")*	5,769	-
Collective assessment allowance #	-	12,486
Regulatory reserve	40,000	13,558
Total capital base	1,843,794	1,803,942
Common equity tier 1/Tier 1 capital ratio	19.186%	21.332%
Total capital ratio	19.674%	21.645%

- * Refers to ECL for Stage 1 and Stage 2
- # Excludes collective assessment allowance which is restricted from Tier 2 capital of the Bank of RM4,637,000 in 31 December 2017.

29. Capital adequacy (continued)

The capital adequacy ratios of the Group and of the Bank are computed in accordance with Bank Negara Malaysia's Capital Adequacy Framework (Capital Components and Basel II – Risk-Weighted Assets) reissued on 2 February 2018. The Group and the Bank have adopted the Standardised Approach for Credit Risk and Market Risk, and the Basic Indicator Approach for Operational Risk. The minimum regulatory capital adequacy ratios before including capital conservation buffer and countercyclical capital buffer ("CCyB") are 4.5% for CET1 Capital Ratio, 6.0% for Tier 1 Capital Ratio and 8.0% for Total Capital Ratio.

The capital conservation buffer required to be maintained in the form of CET1 Capital above the minimum regulatory capital adequacy ratios requirement were phased-in as follow:

Calenda	r year	Capital conservation buffer
2016		0.625%
2017		1.250%
2018		1.875%
2019 on	wards	2.500%

The CCyB which is in a range of between 0% and 2.5% is not a requirement for exposure in Malaysia yet but may be applied by regulators in the future.

The breakdown of risk-weighted assets ("RWA") by each major risk category is as follows:

RISK T	/PE	Risk-Weighted Assets	
		2018 RM'000	2017 RM'000
 Credit risk Market risk Operational risk 		4,945,990 3,645,457 780,229	4,697,225 2,949,956 687,157
Total		9,371,676	8,334,338

30. Commitments and contingencies

The off-balance sheet exposures and their related counterparty credit risk of the Group and of the Bank are as follows:

2018 Group and Bank	Principal Amount	Credit Equivalent Amount	Risk- Weighted Assets

31. Capital management

The wide variety of the Group's businesses requires the Group to identify, measure, aggregate and allocate capital among the businesses appropriately. The Group manages capital through a framework of principles, organisational structures as well as measurement and monitoring processes that are closely aligned with the activities of group divisions. While the Group capital management continuously evolves and improves, there can be no assurance that all market developments, in particular those of extreme nature, can be fully anticipated at all times.

The Group manages capital in a coordinated manner at all relevant levels within the organisation. This also holds true for complex products which the Group typically manages within the framework established for trading exposures. The structure of capital function is closely aligned with the structure of group divisions.

The Group's and the Bank's regulatory capital are determined under Bank Negara Malaysia's revised Risk-Weighted Capital Adequacy Framework and their capital ratios have complied with the minimum requirements set under this guideline. Information on the Group's and the Bank's capital adequacy ratios, regulatory minimum capital requirements and the components of capital base are disclosed in Note 29.

32. Risk management

The Deutsche Bank Group ("DB Group") has extensive risk management procedures and policies in place. The identification, monitoring and management of all risks within the DB Group are integrated into the DB Group-wide risk management processes in order to optimise the risk mitigating effort. Risk management procedures and policies are the responsibility of the DB Group Risk Committee and encompass all types of risk which includes market risk, credit risk and liquidity risk, as well as non-financial risks (including operational risk), and reputational risks. These risk areas are actively managed by dedicated divisions such as the Market Risk Management Division, Credit Risk Management Division, Liquidity Risk Management Division and Operational Risk Management Division.

Treasury is responsible for overall liquidity management of the Bank including proposing liquidity risk limits in line with the tolerance/risk appetite applied by Liquidity Risk Management Division. The Board regularly reviews reports from the respective regional divisions and is made aware of the risk exposure of the Bank and its ongoing management at each board meeting.

Risk management

The Group and the Bank has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk
- Operational risk

Credit risk

Credit risk is the risk of any transactions giving rise to actual, contingent or potential claims against any counterparty, obligor or borrower, where the Group and the Bank bears the risk of loss if the counterparty, obligor or borrower defaults.

Risk management objectives, policies and processes for managing the risk

Policies for managing credit risk are determined by the DB Group Risk Committee, which also delegates credit authorities to independent Risk Officers. Divisional credit portfolio guidelines, credit strategies for the major industries, and product specific policies are the principal instruments to determine the Bank's risk appetite, as well as the framework for the measurement and management of credit risk. Approval of credit limits and management of exposure takes place within the framework of portfolio guidelines and credit strategies.

Credit risk (continued)

Exposure to credit risk, credit quality and collateral

Principal exposures to credit risk in this regard are primarily represented by the carrying amounts of financial instruments and loans, advances and financing portfolios in the statements of financial position. The credit exposures arising from off-balance sheet activities have been disclosed in Note 30 to the financial statements.

(a) Credit quality of gross loans, advances and financing

	Group and Bank		
	2018	2017	
	RM'000	RM'000	
Stage 1 : 12-month ECL Stage 2 : Lifetime ECL not credit-	2,219,391	-	
impaired Stage 3 : Lifetime ECL credit- impaired	60,340	-	
	2,965	-	
	2,282,696	-	
Neither poet due per impeired		2,401,400	
Neither past due nor impaired Past due but not impaired	-	5,507	
Impaired	-	2,032	
	-	2,408,939	
Total	2,282,696	2,408,939	

ECL Stage determination

(i) Stage 2: Lifetime ECL not credit-impaired

At initial recognition, loans which are not purchase or originated credit impaired ("POCI") are reflected in Stage 1. If there is a significant increase in credit risk the loans are transferred to Stage 2. Significant increase in credit risk is determined by using rating related and process related indicators as discussed below:

Rating-related indicators:

Based on dynamic change in counterparty probability of default ("PD") that is linked to all transactions with the counterparty, the lifetime PD at reporting date are compared to the expectations at the date of initial recognition. The loans would be considered as significant deteriorated if for the remaining lifetime of the PD of a transaction given current expectations exceeds the PD of the relevant threshold rating.

Credit risk (continued)

(a) Credit quality of gross loans, advances and financing (continued)

ECL Stage determination (continued)

(i) Stage 2: Lifetime ECL not credit-impaired (continued)

Process-related indicators:

Process-related indicators are derived using existing risk management indicators, which allow the Bank to identify whether the credit risk of the loans has significantly increased. Such indicators but not limited to:

- a) Obligors being added mandatorily to a credit watch list;
- b) Obligors being mandatorily transferred to workout status;
- c) Payments being 30 days or more overdue; or
- d) In forbearance

On an ongoing basis, as long as the condition for one or more of the indicators is fulfilled and the loan is not recognised as defaulted, the loan will remain in Stage 2. If none of the indicator conditions is any longer fulfilled and the loan is not defaulted, the loan is transferred back to Stage 1. In case of default, the loan is allocated to Stage 3.

(ii) Stage 3: Lifetime ECL credit-impaired

Stage 3 is based on the status of the obligor being in default. Loans are deemed credit impaired and in Stage 3 when:

- The Bank considers the obligor is unlikely to pay its credit obligations to the Bank. Determination may include forbearance actions, where a concession has been granted to the borrower or economic or legal reasons that are qualitative indicators of credit impairment; or
 - Contractual payments of either principal or interest by the obligor are past due by more than 90 days.

Credit risk (continued)

(b) Fair value of collateral held against loans, advances and financing to customers and banks

The Group and the Bank hold collateral against loans, advances and financing to customers in the form of mortgage interests over property and guarantees.

Fair value of housing loans collaterals are assessed on yearly basis based on independent valuation.

The fair value of property collateral held against outstanding loans, advances and financing to customers is as per below.

	Group ar 2018 RM'000	nd Bank 2017 RM'000
Against stage 1 : 12-month ECL Against stage 2 : Lifetime ECL not credit-impaired Against stage 3 : Lifetime ECL credit-impaired	17,328 13,217 10,149 40,694	- - -
Against neither past due nor impaired Against past due but not impaired Against individually impaired	- - - - 40,694	19,894 20,709 <u>6,676</u> 47,279 47,279

(c) Credit quality of financial instruments

Set out below is the credit quality of assets analysed by external rating of the counterparties.

Group and Bank	Debt securities at FVTPL RM'000	Debt securities at FVOCI RM'000	Equity investments at FVOCI RM'000
2018			
Domestic Rating			
AAA+ to AA-	600,000	100,000	100
A+ to A-	2,428,482	272,281	-
Unrated	5,005	-	1,491
	3,033,487	372,281	1,591

Credit risk (continued)

(c) Credit quality of financial instruments (continued)

Set out below is the credit quality of assets analysed by external rating of the counterparties. (continued)

	Financial	Financial
	Financial	investments

Unrated		1,491
	1,445,802	1,591

(d) Fair value of collateral held against derivative assets

The Group and the Bank hold collateral against derivative assets to banks and financial institutions counterparties in the form of cash of RM488,630,338 (2017: RM557,327,871) as at the reporting date.

Market risk

Market risk arises from the uncertainty concerning changes in market prices and rates (including interest rates, foreign exchange rates and equity prices, commodity rates and other market risks), the correlations among them and their levels of volatility.

Market risk (continued)

Risk management objectives, policies and processes for managing the risk

Deutsche Bank Group entities, including the Group and the Bank, use a combination of risk sensitivities, Value-at-Risk ("VaR"), sensitivities and stress testing metrics to manage market risks and establish limits. Steered by the DB Group Risk Committee, the Market Risk Management team, which is part of the DB Group's independent risk management function, is responsible for managing the market risk of the Bank. Limits, set commensurate to the risk appetite in terms of VaR, are communicated to the appropriate personnel along with the limit structure for each business division. The majority of the interest rate risk arising from non-trading asset and liability positions is transferred through internal hedges to Treasury and is thus managed on the basis of Banking Book Value-at-Risk.

A summary of the VaR position of the Bank's portfolios is as follows:

	At 31 December RM'000	Average RM'000	Maximum RM'000	Minimum RM'000
2018				
Interest Rate Risk:				
Market Risk	2,641	2,492	4,054	1,294
Specific Risk	53	23	109	1
Foreign Exchange Risk	4,676	2,279	5,632	350
Commodity Risk	1,274	906	4,470	145
Equity Risk	650	783	3,337	183
Total VaR	5,431	3,932	6,818	1,496

Market risk (continued)

Risk management objectives, policies and processes for managing the risk (continued)

A summary of the VaR position of the Bank's portfolios is as follows (continued):

	At 31 December RM'000	Average RM'000	Maximum RM'000	Minimum RM'000
2017				
Interest Rate Risk:				
Market Risk	3,273	3,900	8,577	2,320
Specific Risk	4	10	31	4
Foreign Exchange Risk	3,058	2,730	8,122	462
Commodity Risk	884	1,225	7,148	287
Equity Risk	2,742	2,339	5,985	66
Total VaR	5,842	5,762	9,011	3,737

Market risk (continued)

Value-at-Risk ("VaR")

VaR is a quantitative measure of the potential loss due to market movements, that will not be exceeded in a defined period of time, and with a defined confidence level.

The Bank adopts the DB Group's internal VaR model, which is based on Monte Carlo Simulation technique. VaR is calculated using a 99% confidence level and a one day holding period. One year of historical market data is used as input to calculate VaR. Risks not in value-at-risk are monitored and assessed on a regular basis through our Risk Not In VaR ("RNIV") framework.

Stressed Value-at-Risk ("SVaR") calculates a VaR based on a historical one year period of significant market stress.

	VaR	SVaR
Methodology	Monte Carlo Simulation	Monte Carlo Simulation
Holding Period	1-day	1-day
Confidence Level	99%	99%
Trade Window	Most recent one year period	One year period of significant market stress (high levels of volatility in the top value-at- risk contributors)

DB Group's internal VaR model:

DB Group regularly reviews and validates its VaR model.

Value-at-risk model is subject to known limitations, including:

- (a) The use of historical data may not be a good indicator of potential future events, particularly those that are extreme in nature. The "backward-looking" limitation can cause value-at-risk to understate or overstate risk.
- (b) Assumptions concerning the distribution of changes in risk factors, and the correlation between the different risk factors, may not hold true, particularly during market events that are extreme in nature. While the Group believes the assumptions are reasonable, there is no standard value-at-risk methodology to follow. Different assumptions may produce different results.
- (c) The one day holding period does not fully capture the market risk arising during periods of illiquidity, when positions cannot be closed out or hedged within one day.
- (d) Value-at-risk does not indicate the potential loss beyond the 99th quantile.
- (e) Intra-day risk is not captured.

Liquidity risk

Liquidity risk is the risk to a bank's earnings and capital arising from the inability to timely meet obligations when they come due without incurring unacceptable losses.

Risk management objectives, policies and processes for managing the risk

The objective of the Liquidity Management ("LM") function is to ensure that the Bank can fulfill its payment obligations at all times at reasonable cost, without affecting daily operations of the Bank. All relevant and significant drivers of liquidity risk, onbalance sheet as well as off-balance sheet, are taken into account. Prices of all asset and liability types reflect their liquidity risk characteristics and the Bank's cost of funding. Liquidity management is a governance function which does not report to any business division and which adheres to the rules and regulations issued by BNM, in addition to the Basel Committee on Banking Supervision Principles for Sound Liquidity Risk Management and Supervision, the German Minimum Requirements for Risk Management ("MaRisk") as well as the upcoming regulatory requirements on liquidity risk under Basel III and Capital Requirements Regulation ("CRR").

Liquidity risk is managed through the Asset and Liability Committee ("ALCO"). This committee, chaired by the Treasurer, is responsible for both statutory and prudential liquidity management of the Bank including the approval of liquidity risk limits which are in line with the tolerance/risk appetite applied by Liquidity Risk Control ("LRC"). Decisions made by the ALCO for the Bank are submitted to the Board Risk Management Committee and Board of Directors for notification and for approval where necessary.

Liquidity risk is monitored through local liquidity regulations issued by Bank Negara Malaysia, such as Liquidity Coverage Ratio and the internal liquidity risk management policy. A prudent liquidity risk model is based on two main liquidity risk models such as stress testing and funding matrix. The Bank's stress testing methodology adequately reflects the Bank's business-specific risks and complexity embedded in its business model. Stress testing is monitored on a daily basis, reported to the ALCO at its regular meetings.

Liquidity risk (continued)

(a) Maturity analysis of financial assets and financial liabilities based on remaining contractual maturity

The following tables present the maturity analysis for financial assets and financial liabilities as at 31 December 2018 and 31 December 2017:

Total commitment and contingencies	748,039	44,486	38,161	35,588	866,274

The above disclosure remains appropriate for the Bank level except that included in the deposits from customers is RM20,000 (2017: RM20,000) cash consolidated from the subsidiaries with remaining contractual maturity of up to 30 days.

Other commitments of RM3,709,761,000 (2017: RM3,630,899,000) consist of formal standby facilities and credit lines granted to customers by the Group and the Bank which remain undrawn as at the end of the reporting period, and are subject to drawdown on demand by customers.

Operational Risk

Operational Risk Framework

Operational risk means the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events, and includes legal risk. Operational risk excludes business and reputational risk.

DB Group Non-Financial Risk Management ("Group NFRM") has the responsibility for the design, implementation and maintenance of the Operational Risk Management Framework ("ORMF") including the associated governance structures. DB Group NFRM also has the responsibility for providing a cross-risk assessment and aggregation of risks to provide a holistic portfolio view of the non-financial risk profile of the Bank, which includes oversight of risk and control mitigation plans to return risk within risk appetite, where required.

The Bank takes decisions to manage operational risks, both strategically as well as in day-to-day business. Four principles form the foundation of the Operational Risk Management Framework ("ORMF") at Deutsche Bank:

Operational Risk Principle I: Risk owners have full accountability for their operational risks and have to manage against a defined risk specific appetite. Risk owners are defined to be: First Line of Defence ("LoD") (Corporate and Investment Bank ("CIB"), Deutsche Asset Management, Private Wealth & Commercial Clients ("PW&CC") and first LoD Infrastructure Functions), for all of their operational risks, and second LoD control functions (Infrastructure Functions), for the operational risks that arise in their own activities and processes.

Operational Risk (continued)

Operational Risk Framework (continued)

Risk owners are accountable for managing all operational risks in their business/processes with an end-to-end process view, within a defined operational risk specific appetite and for identifying, establishing and maintaining risk owner (i.e. Level 1) controls. In addition they mitigate identified and assessed risk within the risk specific appetite through remediation actions, insurance or by ceasing/reducing business activities.

Divisional Control Officers, or the equivalent in infrastructure functions, support the risk owners. They are responsible for embedding the ORMF within the relevant business division or infrastructure function. They assess the effectiveness of the Level 1 Controls, monitor the aggregated risk profile and put the appropriate control and mitigating actions in place within the relevant division. The Divisional Control Officers also establish appropriate governance forums to oversee the operational risk profile and are involved in decision making processes.

Operational Risk Principle II: Risk Type Controllers are independent second LoD control functions that control specific risk types as identified in the Operational Risk Type Taxonomy.

Risk Type Controllers are responsible for establishing an effective risk management framework for the risk type they control. They define risk type taxonomy and minimum control standards and set the risk specific appetite. Risk Type Controllers challenge, assess and report the risks in their remit and perform Level 2 Controls, complementary to the Level 1 Controls. Finally they establish independent operational risk governance, and prepare aggregated reporting into the DB Group Non-Financial Risk Committee.

Operational Risk (continued)

Operational Risk Framework (continued)

Operational Risk Principle III: DB Group NFRM establishes and maintains the DB Group Operational Risk Management Framework. DB Group NFRM develops and maintains the DB Group's framework, defining the roles and responsibilities for the management of operational risk across the Bank and the process to identify, assess, mitigate, monitor, report and escalate operational risks. DB Group NFRM also maintains the operational risk type taxonomy and oversees the completeness of coverage of risk types identified in the taxonomy by second LoD control functions, in line with the DB Group wide risk taxonomy standards. It also provides the tools for, and monitors execution and results of, the DB Group's Risk and Control Assessment process.

DB Group NFRM also provides independent challenge of the DB Group's operational risk profile providing independent risk views to facilitate forward looking management of the risks. The function independently reviews, monitors and assesses material risks and key controls at a divisional and infrastructure level across the Bank. It further monitors and reports on the DB Group's operational risk profile in comparison to the DB Group Risk Appetite, to systematically identify operational risk themes and concentrations, and to oversee that risk mitigating measures and priorities have been agreed. DB Group NFRM establishes reporting and escalating procedures up to the Management Board for risk assessment results and identified material control gaps, while informing Group Audit of material control gaps.

Operational Risk (continued)

Operational Risk Framework (continued)

Operational Risk Principle IV: DB Group NFRM aims to maintain sufficient capital to underpin operational risk. DB Group NFRM is accountable for the design, implementation and maintenance of an appropriate approach to determine a sufficient level of capital demand for operational risk for recommendation to the Management Board. To fulfill this requirement DB Group NFRM is accountable for the calculation and allocation of operational risk capital demand and Expected Loss planning under the Advanced Measurement Approach ("AMA"). DB Group NFRM is also accountable for the facilitation of the annual operational risk capital planning and monthly review process.

33. Financial assets and liabilities

33.1 Categories of financial instruments

The table below provides an analysis of financial instruments as at 31 December 2018 categorised as follows:

- (a) Fair value through profit or loss ("FVTPL");
- (b) Amortised cost ("AC"); and
- (c) Fair value through other comprehensive income ("FVOCI")
 - Debt securities
 - Equity investments

33.1 Categories of financial instruments (continued)

The above disclosure is also applicable for the Bank level except that included in the deposits from customers is RM20,000 (2017: RM20,000) cash consolidated from the subsidiaries.

33.2 Determination of fair value and the fair value hierarchy

MFRS 13, *Fair Value Measurement* requires each class of assets and liabilities measured at fair value in the statements of financial position after initial recognition to be categorised according to hierarchy that reflects the significance of inputs used in making the measurements, in particular, whether the inputs used are observable or unobservable as discussed in Note 2(c)(vi).

33.2 Determination of fair value and the fair value hierarchy (continued)

33.2.1 Financial instruments carried at fair value

The following table shows the Group's and the Bank's financial instruments which are measured at fair value at the reporting date analysed by the various level within the fair value hierarchy:

Group and Bank	Level 1 RM'000	Level 2 RM'000	Level 3 RM'000

or loss:		
- Settlements	104,701	606
- Attributable to losses recognised		
relating to financial liabilities that have not been realised	(670)	(0/ 627)
· · · · · · · · · · · · · · · · · · ·	(670)	(94,627)
Balance at 31 December	(3,172)	(107,203)

The unrealised gains/(losses) have been recognised net within noninterest income in profit or loss as shown in Note 18.

33.2 Determination of fair value and the fair value hierarchy (continued)

33.2.2 Financial instruments not carried at fair value

In respect of cash and short-term funds, other assets (excluding derivatives), statutory deposit with Bank Negara Malaysia, deposit with banks and other financial institutions, deposits and placements of banks and other financial institutions and other liabilities (excluding derivatives), the carrying amounts in the statements of financial position approximate their fair values due to the relatively short-term/on demand nature of these financial instruments.

The fair values of other financial assets/liabilities, together with the carrying amounts shown in the statements of financial position, are as follows:

Group 2018	Carrying value RM'000	Fair value RM'000
Financial assets Loans, advances and financing	2,275,345	2,275,072
Financial liabilities Deposits from customers	4,226,840	4,240,832
2017 Financial assets Loans, advances and financing	2,391,753	2,391,472
Financial liabilities Deposits from customers	4,627,017	4,735,125

33.2 Determination of fair value and the fair value hierarchy (continued)

33.2.2 Financial instruments not carried at fair value (continued)

The disclosure is also applicable for the Bank level except that included in the deposits from customers is RM20,000 (2017: RM20,000) cash consolidated from the subsidiaries.

(a) Loans, advances and financing

The fair values of fixed rate loans with remaining maturity of less than one year and variable rate loans are estimated to approximate their carrying values. For fixed rate loans with maturities of more than one year, the fair values are estimated based on expected future cash flows of contractual instalment payments and discounted at prevailing rates at reporting date offered for similar loans. In respect of impaired loans, the fair values are deemed to approximate the carrying values, net of individual assessment allowance for impaired debts and financing.

(b) Deposits from customers

The fair values for deposit liabilities payable on demand (demand and savings deposits) or with remaining maturities of less than one year are estimated to approximate their carrying values at reporting date. The fair values of fixed deposits with remaining maturities of more than one year are estimated based on discounted cash flows using rates currently offered for deposits of similar remaining maturities.

The fair value of loans, advances and financing and deposits from customers shown above are classified under Level 3 within the fair value hierarchy disclosure in accordance to MFRS 7.

33.3 Derivative financial instruments

The following table shows the notional and market values of the derivatives financial instruments as at 31 December 2018 and 31 December 2017:

		Group and Bank		
		Positive	Negative	
		market	market	
	Notional	value	value	
2010	RM'000	RM'000	RM'000

	1,576,409		- 1,576,40	9 (574,967)	(1,197,094)	(195,652)

* Include securities accepted as collateral

33.4 Offsetting of financial assets and financial liabilities (continued)

Financial assets and financial liabilities are offset and the net amount is reported in the statements of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

Derivatives and reverse repurchase agreements included in the amount not set-off in the statements of financial position relate to transactions where:

- (i) the counterparty has an offsetting exposure with the Group and the Bank and a master netting or similar arrangements is in place with a right to set-off only in the event of default, insolvency or bankruptcy; and
- (ii) cash and securities are received or cash pledged in respect of the transaction described above.

34. Equity compensation benefits

The Bank participates in the following share and options compensation plans operated by Deutsche Bank AG ("DB").

Share Plans

All awards represent a contingent right to receive DB common shares after a specified period of time. The award recipient is not entitled to receive dividends before the settlement of the award.

34. Equity compensation benefits (continued)

Deutsche Bank Share Scheme

Under the Deutsche Bank Share Scheme ("the Scheme"), selected employees are granted deferred share rights to receive DB shares at a specific future date. These may be granted as part of annual bonuses or as exceptional awards in the case of sign-ons, buy-outs or as retention incentives. The compensation expense is recognised on a straight line basis over the vesting period, which is generally three years for the annual awards.

DB Global Share Purchase Plan

The DB Group offers a broad-based employee share ownership plan entitled Global Share Purchase Plan ("GSPP"). The GSPP offers all active employees at participating Deutsche Bank entities the opportunity to purchase Deutsche Bank shares in monthly instalments over one year. At the end of the purchase cycle, the Bank matches the acquired stock in a ratio of one to one up to a maximum of ten free shares, provided that the employee remains at Deutsche Bank Group for another year. In total, about 12,453 staff from 20 countries enrolled in the tenth cycles that began in November 2018.

DB Equity Plan

The DB Group made grants of share-based compensation under the DB Equity Plan. This plan represents a contingent right to receive Deutsche Bank common shares after a specified period of time. The award recipient is not entitled to receive dividends during the vesting period of the award.

The share awards granted under the terms and conditions of DB Equity Plan may be forfeited fully or partly if the recipient voluntarily terminates employment before the end of the relevant vesting period. Vesting usually continues after termination of employment in cases such as redundancy or retirement.

34. Equity compensation benefits (continued)

DB Equity Plan (continued)

In countries where legal or other restrictions hinder the delivery of shares, a cash plan variant of the DB Equity Plan was used for granting awards.

During the year, RM3,326,080 (2017: RM1,413,236) of expense was recognised in profit or loss.

Movements in the number of deferred share rights held by employees are as follows:

Group and Bank	2018 Number of deferred share rights	2017 Number of deferred share rights
Outstanding at 1 January Granted during the year Vested to employees during the year	78,775 32,656 (10,762)	46,715 65,876 (33,816)
Outstanding at 31 December Grant value of share awards outstanding at 31 December	100,669 2018 €'000 1,191	78,775 2017 €'000 917
Grant value of share awards issued to the Scheme in the year	433	689
Grant value of share awards vested to employees in the year	237	714

35. Changes in significant accounting policies

During the year, the Group and the Bank adopted MFRS 15, *Revenue from Contracts with Customers* and MFRS 9, *Financial Instruments* on their financial statements. The Group and the Bank generally applied the requirements of these accounting standards retrospectively with practical expedients and transitional exemptions as allowed by the standards. Nevertheless, as permitted by MFRS 9, the Group and the Bank have elected not to restate the comparatives.

There is no impact arising from the adoption of MFRS 15.

MFRS 9, Financial Instruments

MFRS 9 sets out requirements for recognising and measuring financial assets, financial liabilities and some contracts to buy or sell non-financial items. This standard replaces MFRS 139, *Financial Instruments: Recognition and Measurement*.

The following table summarises the impact, net of tax, of transition to MFRS 9 on the opening balance of reserves and retained earnings:

		Impact of adopting MFRS 9
Group and Bank	Note	on opening balance
		RM'000
Fair value reserve Reclassification of debt securities from FVTPL to FVOCI	(i)	58
Recognition of expected credit losses ("ECL") under MERS 9 for debt securities at EVOCI	(ii)	2
Related tax		(14)
Impact at 1 January 2018		46
Retained earnings		
Reclassification of debt securities from FVTPL to FVOCI	(i)	(58)
Recognition of expected credit losses under MFRS 9	(ii)	(5,693)
Reversal of MFRS 139 impairment	(iii)	17,186
Related tax		(2,744)
Impact at 1 January 2018		8,691

35. Changes in significant accounting policies (continued)

MFRS 9, Financial Instruments (continued)

(i) The following table explains the original measurement categories under MFRS 139 and the new measurement categories under MFRS 9 for each class of the Group's and the Bank's financial assets as at 1 January 2018.

Group and Bank	Original classification under MFRS 139	New classification under MFRS 9	Original carrying amount under MFRS 139 RM'000	New carrying amount under MFRS 9 RM'000
Financial assets				
Cash and cash equivalents	Loans and receivables	Amortised cost	3,749,261	3,749,254
Reverse repurchase agreements	FVTPL-HFT	FVTPL	69,042	69,042
Financial securities				
- Debt securities	FVTPL-HFT	FVTPL- debt securities	1,265,566	1,265,566
- Debt securities	FVTPL-HFT	FVOCI – debt securities	180,236	180,236
- Equity investments	Available-for-sale	FVOCI – equity investments	1,591	1,591
Loans, advances and financing	Loans and receivables	Amortised cost	2,391,753	2,403,255
Derivatives assets	FVTPL-HFT	FVTPL	1,302,496	1,302,496
Statutory deposit with Bank				
Negara Malaysia	Loans and receivables	Amortised cost	100,000	100,000
Other assets	Loans and receivables	Amortised cost	420,693	420,693
Total financial assets			9,480,638	9,492,133

35. Changes in significant accounting policies (continued)

MFRS 9, Financial Instruments (continued)

(ii) The following table reconciles the carrying amounts under MFRS 139 to the carrying amounts under MFRS 9 on transition to MFRS 9 on 1 January 2018.

Group and Bank	MFRS 139 carrying amount 31 December 2017 RM'000	Reclassification RM'000	Remeasurement RM'000	MFRS 9 carrying amount 1 January 2018 RM'000
Financial assets:				
Amortised Cost

Financial securities – equity	-	1,591	-	1,591
Total FVOCI - equity	-	1,591	-	1,591

35. Changes in significant accounting policies (continued)

MFRS 9, Financial Instruments (continued)

(iii) Impairment of financial assets

The following table reconciles the closing impairment allowance for financial assets in accordance with MFRS 139 and the opening ECL allowance determined in accordance with MFRS 9 as at 1 January 2018.

Group and Bank	MFRS 139 carrying amount 31 December 2017 RM'000	Reclassification RM'000	Remeasurement RM'000	MFRS 9 carrying amount 1 January 2018 RM'000
Cash and cash equivalents	-	-	7	7
Loans and advances to customers	17,186	-	(11,502)	5,684
Total	17,186	-	(11,495)	5,691

The Group and the Bank have determined the impact of the application of MFRS 9's impairment requirements at 1 January 2018 and results are as follows:

Loss allowance at 31 December 2017 under MFRS 139	Group and Bank RM'000 17,186
Reversal of loss allowance under MFRS 139	(17,186)
Impairment recognised at 1 January 2018 on:	
Cash and cash equivalent	7
Loan, advances and financing	5,684
Debt securities at FVOCI	2
Loss allowance at 1 January 2018 under MFRS 9	5,693

36. The operations of Islamic Banking

Statement of financial position as at 31 December 2018

Assets	Note	2018 RM'000	2017 RM'000
Cash and short-term funds Other assets	(a)	94,593 8	115,686 28

(Note 36(a))	94,593	115,686

The notes on pages 129 to 131 are an integral part of these financial statements.

BNM had given its approval on 22 August 2007 for the Bank to conduct Islamic Banking business under Section 124 of the Banking and Financial Institutions Act, 1989 (Now repealed and replaced by the Financial Services Act, 2013).

Shariah Committee

The Shariah Committee was established under BNM's "Guidelines on the Governance of Shariah Committee for the Islamic Financial Institutions" (BNM/GPS1) to advise the Board of Directors on Shariah matters in its Islamic business operations and to provide technical assistance in ensuring the Islamic Banking products and services offered by the Bank and the relevant documentation are in compliance with Shariah principles.

During the financial year ended 31 December 2018, a total of 4 meetings were held. The Shariah Committee comprises the following members and the details of attendance of each member was as follows:

Members	Number of Shariah meetings attended	
Dr Sheikh Hussein Hamed Sayed Hassan	4/4	
Dr Muhammad Qaseem	4/4	
En. Mohd Hilmi bin Ramli	4/4	

Basis of measurement

The financial statements of the Islamic Banking business have been prepared on the basis consistent with that of the Group and of the Bank as disclosed in Notes 1 and 2 to the financial statements of the Group and of the Bank and have been prepared on the historical cost basis, except as mentioned in the respective accounting policy notes.

(a) Cash and short-term funds

		2018 RM'000	2017 RM'000
	Cash and balances with banks and other financial institutions	94,593	115,686
(b)	Deposits from customers		
		2018 RM'000	2017 RM'000
	Non-Mudharabah Demand deposits	54,449	68,590
(c)	Other liabilities		
		2018 RM'000	2017 RM'000
	Bills payable Other liabilities	12 3,699	166 11,263
		3,711	11,429

(d) Capital adequacy

The capital adequacy ratios of the Islamic Banking business of the Group are computed in accordance with the Capital Adequacy Framework for Islamic Banks ("CAFIB"). The Group's Islamic Banking business has adopted the Standardised Approach for Credit Risk and Market Risk, and the Basic Indicator Approach for Operational Risk.

(d) Capital adequacy (continued)

Components of Tier I and Tier II capital:

	2018 RM'000	2017 RM'000
Tier 1 capital		
Capital funds	25,000	25,000
Retained earnings	10,643	8,116
Total common equity tier 1/Total tier 1 capital	35,643	33,116
Total Tier 2 capital		
Capital base	35,643	33,116
Common equity tier 1/Tier 1 capital ratio	498.808%	585.865%
Total capital ratio	498.808%	585.865%

The breakdown of risk-weighted assets ("RWA") by exposures in each major risk category is as follows:

Risk Type Risk-Weighted A		nted Assets
	2018 RM'000	2017 RM'000
 Credit risk Market risk Operational risk 	938 1,875 4,333	843 1,687 3,123
Total	7,146	5,653
